

CRIMINAL JUSTICE STATISTICS 161-003 SPRING 2003
CLASS PROFILE QUESTIONNAIRE

DIRECTIONS. The questionnaire has several sections. At the end of each section, please check that you are in the correct column on the opscan sheet. ALL ANSWERS GO ON THE OPSCAN SHEET. Each question number corresponds to the question number on the op-scan sheet. SOME QUESTIONS REQUIRE THAT YOU USE TWO COLUMNS.

STATEMENT OF INFORMED CONSENT

In this class I routinely ask all students to complete a questionnaire tapping attitudes, behaviors, and experiences. ***You do NOT have to do this. This is voluntary.*** But if you do choose to participate, your answers will be used for two purposes: to generate a course profile - so we can learn more about the students in the class - and to illustrate different points of course content. This information helps us learn more about how much you differ from one another, and how you compare to national samples on some items. I will use some of this material in class illustrations, but in those illustrations I will NEVER identify specific individuals. My primary purpose here is to try and improve what you learn in this course, and to learn more about what you learn. In short, the biggest potential benefit you may reap from completing this questionnaire is learning more about yourself and your classmates, and enhancing the learning environment in this class by allowing us to use data that describe you and your classmates.

If you agree to complete this questionnaire, the risks posed by doing so are minimal and are no more than would be experienced in daily life. The biggest potential risk is loss of confidentiality. Someone could find out what you said on your questionnaire. To protect against potential loss of confidentiality I will a) destroy the original answer sheets once the data have been scanned in; b) keep the data files only on a password-protected computer to which only I or the teaching assistant have access; and c) you can leave the name and SSN on the answer sheet BLANK. Further d) I will not carry out any analyses that identify specific individuals; I will only report results for the group or for subgroups. Finally, e) I will not release these data to anyone unless ordered to do so by a court of law. Of course, if a court does order me to do so I will resist as best I can, but there is a chance I may be forced to turn them over.

You have a right to ask me any questions about these data, and to have those questions answered to your satisfaction. You have the right to not complete these questions.

If you choose NOT to complete the questionnaire, you may leave class now. If you agree to participate, go ahead and fill out the answer sheet.

KEEP THIS QUESTIONNAIRE SINCE YOU WILL REFER TO IT FREQUENTLY AS THE SEMESTER GOES ALONG.
